AGRIMA SAREEN

COMPUTER SCIENCE / DATA SCIENCE / SOFTWARE & APPLIED AI

agrimasareen19@gmail.com | github.com/agrimasareen | VIT Vellore · India

PROFILE

First-year B.Tech student in Computer Science and Engineering (Data Science) at VIT Vellore, interested in software development, applied AI and data-driven systems. Has built and contributed to projects spanning Python development, machine learning, web technologies and agentic AI, with experience working in collaborative project teams.

EDUCATION

Vellore Institute of Technology (VIT), Vellore
B.Tech — Computer Science and Engineering (Data Science)

2026 – Present
Undergraduate

SELECTED PROJECTS

Metadata Scrubber · VINHACK 2026 · View repository ■
- Contributed to the backend of a collaborative tool designed to identify and remove sensitive metadata from files. Focused on image EXIF handling and the integration of the scrubbing workflow with a Flask API. Python · Flask · Flask-CORS · ExifRead

Healthcare Agentic AI · Academic Project
- Collaborating on an academic prototype that combines agent workflows and retrieval-augmented generation to provide evidence-aware symptom guidance. Project work includes API design, privacy and security considerations, uncertainty handling and evaluation. Python · LangGraph · FastAPI · RAG

Iris ML Classifier · View repository ■
- Built a classification project comparing Decision Tree and K-Nearest Neighbours models on the Iris dataset, with a simple interface for exploring predictions. Python · scikit-learn · Machine Learning

Gemini Terminal AI Agent · Prototype
- Developed an early terminal-based AI agent prototype using the Google Gen AI SDK, exploring model-assisted developer workflows. Python · Google Gen AI SDK

Code Readability AI Agent · Concept / Prototype
- Explored an AI-assisted code review concept for assessing repository readability and presenting actionable feedback to developers.

TECHNICAL SKILLS

Programming	Python, JavaScript	**Web**	HTML, CSS, JavaScript
AI / ML	Machine learning fundamentals, RAG, agentic AI concepts	**Tools & frameworks**	Flask, FastAPI, LangGraph, scikit-learn, Git

ADDITIONAL INTERESTS

Applied artificial intelligence · Backend development · Web development · Data science · Collaborative software projects

---

Project descriptions reflect prototype and collaborative work where applicable. Additional project demos and professional links can be added as they become available.
